Dear Sebastian Bankowski,

RE: Create strategies to improve the quality of life of the elderly by revising virtual reality programs to support healthy ageing

### Submission Confirmation

Thank you for submitting the above trial for registration with the Australian New Zealand Clinical Trials Registry.

### Your request number is: 388395

Please take a note of this number and use it when making any enquiries about your submission. The request number is NOT the registration number.

**In order for prospective registration to be obtained, a trial must complete the registration process and have a trial registration number (ACTRN) issued before enrolment of the first participant.**

ANZCTR staff will check your submission and contact you by email in due course.

\* **Please note:** As the ANZCTR is funded by Australian and New Zealand organisations we must prioritise submissions from these countries first, followed by submissions from countries that do not have their own primary registries, and then submissions from countries that do have their own primary registry in the WHO Registry Network. Accordingly, there may be delays in processing your submission. Apologies for any inconvenience.

Kind regards,

ANZCTR Staff
